## EDUCATION

---

|                                                  |             |
|--------------------------------------------------|-------------|
| High School UP Board – 77.33%                    | 2018 – 2019 |
| Intermiddiate UP Board – 64.32%                  | 2019 – 2021 |
| Veer Bahadur Singh Purvanchal University Jaunpur |             |
| Bachelor of Computer Application (BCA)           | 2021 – 2024 |

## SKILLS

---

### Frontend:

HTML, CSS, JavaScript (Basic), Tailwind CSS, Bootstrap

### Backend:

MYSQL, PostgreSQL, SQL, PHP (Laravel – MVC Architecture), Python (Django – MVC Architecture), RESTful API Development, Authentication & Authorization

### API & Testing:

RESTful APIs, Postman

### Elementary:

Object-Oriented Programming (OOPs), MVC Architecture

### Soft Skills:

Communication skill, Teamwork, Problem solving

## WORK EXPERIENCE

---

### Software Developer in TechnoBren Infotech Pvt. Ltd.

Location – *Jaunpur*

March 2025 – Present

- Gained hands-on experience in backend development using PHP, Laravel, and SQL to build scalable and secure web applications following MVC architecture.
- Developed and consumed RESTful APIs, implemented CRUD operations, and worked with Laravel Controllers, Services, Requests, and Resources for clean code structure
- Utilized Eloquent ORM for database interactions, relationships, and query optimization, including indexing and efficient data filtering.
- Implemented form request validation, centralized exception handling, and standardized API responses.
- Worked with authentication and authorization mechanisms, including middleware and role-based access control.
- Collaborated with cross-functional teams to debug issues, refactor code, and deploy application updates efficiently.

---

### Software Developer in Digipodium - It Training/Technology and research center

Location – Lucknow Hazratganj,

2024 Jun – Sep 2024

- Learned and applied front-end technologies like HTML, CSS, React.js and JavaScript and Backend development like Python, MySQL to build responsive websites.
- Collaborated with the team on real-world projects, improving UI/UX designs.
- Gained hands-on experience in debugging and optimizing web performance.

## PROJECTS

---

### 1. Hariss International: Laravel Backend System

#### Role: Laravel Developer

Contributed to the development of a Laravel-based backend application following MVC architecture and best coding practices. Implemented secure authentication using Laravel Passport and Sanctum, and managed role-based access control with Spatie. Developed and maintained RESTful APIs with proper request validation, structured response handling, and centralized exception management. Worked on relational database design using Eloquent ORM, optimized queries through indexing, and supported third-party API integrations. Performed API testing and validation using Postman to ensure reliability and consistency.

---

### 2. CookingStories: A Recipe Sharing Platform

CookingStories is a user-friendly platform for exploring recipes, sharing culinary creations, and connecting with food lovers.

- Backend: Django for server-side logic, SQLite for database management.
- Frontend: HTML, CSS, JavaScript, Tailwind CSS, and Bootstrap for a responsive design.
